

# CASE STUDY - TAG Farnborough Airport

Exclusively dedicated to business aviation, TAG Farnborough Airport is the most modern and efficient private airport of its kind in Europe. Farnborough Airport is a magnificent gateway to London, making it a most preferred private airport.

Saxon Design have been working with TAG Farnborough Airport since 2008 providing stand and chalet design and build. By incorporating themes and architectural features from the terminal building we have delivered strongly branded and recognisable environments.

Quote from our client - Elaine Turner - Events Manager, TAG Farnborough Airport

*"I wanted to officially thank you for all your work and contribution towards our chalet. I thought the chalet looked great and the overall feedback was very positive."*
